The Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) Regulations

January 2023

To whom it may concern

EU REACH and UK REACH require companies to identify and manage the risks present by substances they manufacture and market in the EU and GB respectively.

Both legislations require the relevant authority to identify Substances of Very High Concern (SVHCs). Once identified and agreed, these substances are included in the "Candidate List" and considered for inclusion in the "Restriction List" (Annex XVII), and/or the List of Substances Subject to Authorisation (Annex XIV).

We regularly review the materials used in the manufacture of powder coatings against the requirements of EU REACH and UK REACH.

Based on our current knowledge of these products and the information (such as safety data sheets) provided to the company by its raw material suppliers, we have identified the following substances:

Substance CAS Number	EU REACH	UK REACH	Comments
4,4'-isopropylidenediphenol (BISPHENOL A) 80-05-7	Candidate List	Candidate List	Used in some epoxy products
2-methylimidazole (2-MI) 693-98-1	Candidate List	Candidate List	Used in some epoxy products

Where these substances are used, they are identified in the appropriate safety data sheet.

Should you require a statement for your particular products, please contact us at reach@hmgpowders.co.uk and we will be happy to help with your enquiries.

Do not hesitate to contact us if you have any further questions regarding our products.

Yours faithfully

Denis Corry

REACH Coordinator
